NEW AGE KARTING

## IGNITION COIL

**Dear distributor,**

enclosed we would like to introduce you a technical change implemented to the ROTAX 125 MAX, 125 Junior MAX, 125 Mini MAX and 125 Micro MAX.

Ignition coil 265572 (**black connector**) is replaced by ignition coil 265578 (**green connector**).

Because of misfires which can happen during operating the engine in special conditions we are introducing now an ignition coil with higher output voltage in order to improve that problem.

The ignition coil 265578 is available as of now.

The ignition coil 265578 is of course legal in the ROTAX MOJO MAX CHALLENGE races.

Please advise your technical scrutineers accordingly.

Best regards,

BRP-Powertrain
